## **SCIENCE & TECHNOLOGY**

### **CMPDIL Invents New Dust Control Technology**

- Central Mine Planning and Design Institute Limited (CMPDIL), Ranchi (a consultancy subsidiary of Coal India Limited) has invented a ‘System and Method for Controlling Generation and Movement of Fugitive Dust’.
- It is to minimize and control the fugitive dust in mining areas.
- The system can be used in mines, thermal power plants, railway sidings, ports, and construction sites wherein coal or other minerals/fugitive materials are stored under the open

sky.

- Apart from reducing dust generation from open sources, it will also provide noise attenuation.
- The invention relates to the synchronized application of windbreak (WB) and vertical greenery system (VGS) for reducing the generation and dispersion of fugitive dust.
