INTERNATIONAL NEWS

Mammoth collision of 'impossible' black holes detected for first time

- The collision of Impossible Black Holes was detected and directly observed by the Laser Interferometer Gravitational Wave Laboratory (LIGO) Scientific Collaboration and the Virgo Collaboration also known as LVC (LIGO Scientific Collaboration and VIRGO Collaboration) including the scientists from the Australian National University (ANU).
- The short gravitational-wave signal, GW190521, captured by the LIGO and Virgo gravitational wave observatories in the United States and Europe on 21 May last year, came from two highly spinning, mammoth black holes weighing in at a massive 85 times and 66 times the mass of the Sun, respectively.
- The larger of the two black holes is considered 'impossible.'
- Astronomers predict that stars between 65 and 130 times the mass of the Sun undergo a process called pair-instability, resulting in the star being blown apart, leaving nothing behind.

India proposes voluntary G-20 principles on cross border movement

- India has proposed for the development of voluntary 'G-20 Principles on Coordinated Cross-Border Movement of People' at the G-20 foreign ministers meeting in Riyadh.
- The meet was chaired by the Minister of Foreign Affairs of Kingdom of Saudi Arabia, Prince Faisal Bin Farhan Al- Saud where Indian side was represented by Union Minister for External Affairs Jaishankar.
- The discussions were on strengthening international cooperation across borders in the wake of COVID-19 crisis.
- The Ministers also exchanged national experiences and lessons learned from the cross-border management measures taken in response to the COVID-19 pandemic.
